A 60-second check on your phone

4 signs your website is *losing you customers.*

Swipe →

1

The Google link doesn't open *your real site.*

Search your business name and tap Website. An old page, an error or someone else's site is where people give up.

Try it now

Google your business name, then tap Website.

Swipe →

2

Ringing you takes *more than one tap.*

From your homepage, try to call or WhatsApp yourself. If you have to hunt for the number or copy it, most people won't bother.

Try it now

Open your homepage on your phone and tap to call.

3

Prices, menu or hours take *longer than ten seconds.*

Time yourself. If you're pinching, zooming or digging through menus, a customer on a bus won't.

Try it now

Start a timer and find your prices, menu or opening hours.

Swipe →

4

The footer says *2019.*

Scroll to the very bottom. An old year, a broken link or “under construction” tells people nobody’s minding the shop.

Try it now

Scroll to the very bottom of your homepage and read the year.

Failed one? *Get a free X-ray.*

Send me your website. Within 48 hours you'll get how it works on a phone, how you look on Google, and the one thing I'd fix first.
